

# BROMPTON

MADE IN LONDON  
SINCE 1975

# nothing folds like a Brompton folds

Invention, innovation, imagination. These ideals have been the driving principles at Brompton since the beginning when founder Andrew Ritchie set out to engineer a compact bike to unlock the city. For five decades, Brompton has set the standard for folding bikes - transforming the way people move in and beyond cities across the globe.

Every bike is handmade, and quality assured in our London Factory. Robust, functional and super fun to ride, Brompton products are made for everyday life and a long life.

Ready to unfold?

Super simple.  
Super compact.

# Brompton parts and accessories

Expertly engineered to make moving through the city and beyond even easier.

## Brompton Luggage System

Brompton bags sit securely on the front of your bike with one quick click. The unique mounting system places the weight on your frame instead of the handlebars. So, when carrying loads, your ride remains brilliantly stable.

## Be Seen Lights

Visibility light set. Bright, compact and made for Brompton.

## Brompton Toolkit

The essential tools, tucked away inside your frame.

## Brompton Bell - polished brass

Sounds a cheerful F7 note.

# fit guide

A C

P T

16" wheel

**Low**  
The straight handlebar.  
For a sporty, more forward position.
